DTF Desktop Printers

Converted DTF Printer – Affordable Direct to Film Printing for Startups

A **Converted DTF Printer** is a modified inkjet printer, often based on Epson models like L1800, L805, or L8050, repurposed for Direct to Film (DTF) printing. These entry-level printers are ideal for small businesses, startups, and custom apparel creators looking to get started in the DTF printing industry without a large initial investment.

By replacing standard inks with **DTF-compatible inks** and incorporating a basic film feeding system, converted printers can produce vibrant and washable transfers that can be applied to a variety of fabrics such as cotton, polyester, and blends.

Key Features of a Converted DTF Printer:

- Based on trusted Epson models like L1800, L805, or L8050
- Uses DTF inks and PET film for high-quality garment transfers
- Ideal for printing on t-shirts, tote bags, caps, and more
- Compact and budget-friendly for home or studio setups
- Requires additional equipment like powder shaker, oven, or heat press

Best For:

- Small business owners and fashion startups
- Custom t-shirt businesses
- DIY crafters and print-on-demand creators
- First-time DTF users looking to explore the industry

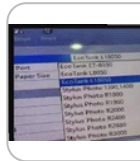

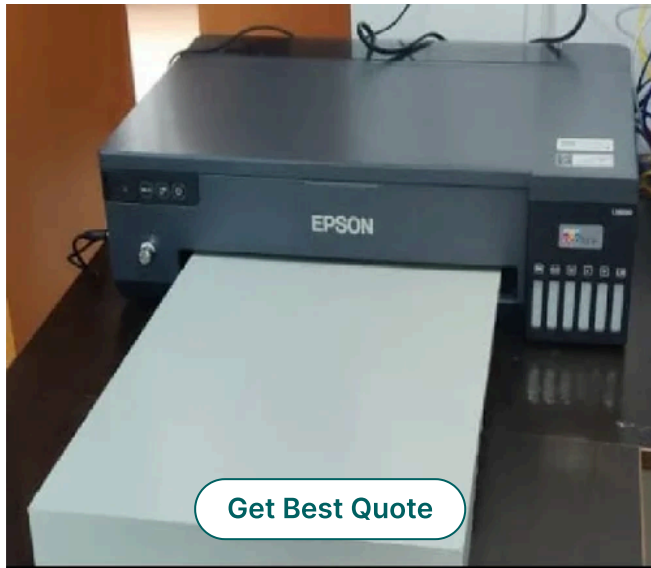

Things to Keep in Mind:

While converted DTF printers are excellent for beginners, they require regular maintenance like nozzle checks, white ink circulation, and cleaning to prevent clogging. They also work best when paired with good-quality DTF inks, powder, and film to ensure reliable results.

Epson L18050 DTF Printer

 Product Brochure

Capacity	15 per hours
Object To Be Printed	T Shirt
Usage/Application	8hrs
Voltage	220
Model	L18050
Print head Type	Epson L18050 Micro Piezo
Printing technology	Piezoelectric Inkjet (epson based)
Maximum Resolution	up to 5760*1440 dpi
Nozzle Configuration	CMYK+White

Minimum order quantity: 1 Piece

Introducing the **Epson L18050 DTF Printer**, an advanced Direct to Film (DTF) printing solution built for vibrant textile printing on cotton, polyester, blends, and more. Ideal for startup entrepreneurs, t-shirt printing businesses, and textile manufacturers, this printer offers **photo-quality output, vibrant color reproduction, and cost-effective printing.**

Equipped with **DTF-compatible firmware and software**, the L18050 model is a **perfect upgrade** over the older L805/L1800 models, ensuring higher speed and better reliability.

 **Key Features:**

-  **Model:** Epson EcoTank L18050 DTF Printer
-  **Print Technology:** Piezoelectric Inkjet (Modified for DTF)
-  **Print Resolution:** Up to 5760 × 1440 dpi
-  **Ink Type:** DTF Pigment Ink (CMYK + White)
-  **Media Type:** DTF Film (PET) – A4 / A3 / Roll Supported
-  **Roll Feeding Support:** Manual or External Feeder (Optional)

-  **White Ink Circulation System:** Optional External Tank Setup
-  **Printing Speed:** ~3–5 mins for A3 full color with white
-  **Maintenance:** Easy to clean and maintain with proper capping station
-  **Software:** AcroRip or similar RIP software compatible
-  **Connectivity:** USB 2.0 High Speed
-  **Power Supply:** 220V Compatible

 **Applications:**

- Custom T-shirt Printing
- Kidswear and Sportswear
- Hoodies, Bags, and Caps
- Custom Fabrics and Textiles
- Low-quantity or On-demand Garment Printing

 **What's Included in the Box:**

- Epson L18050 Modified Printer (DTF-ready)
- Ink Tank or External Ink System (Optional with White Circulation)
- 100ML Starter DTF Ink Set (CMYK + White)
- 10 Sheets of A4 DTF Film
- Power Cable and USB Cable
- Software Installation Support
- Installation & Training Video/Remote Assistance

 **Why Buy from Us?**

-  Trusted DTF Machine Importer & Brand
-  1-Year Warranty & Support
-  India-wide Shipping & Onsite Support Available
-  Repair & Spare Part Support
-  Quick Response on WhatsApp / Call

DTF, or Direct to Film, conversion is a process used in the printing industry to transfer digital images directly onto film without the need for traditional methods like printing plates. It involves using specialized printers that apply ink directly onto a transparent film substrate. DTF conversion offers advantages such as cost-effectiveness, faster turnaround times, and the ability to reproduce intricate details accurately. This method is commonly used in screen printing and other applications where high-quality image reproduction is essential.

Resolution 1080p

1. Large Format Printing: The L18050 is equipped to handle large format printing, making it suitable for printing on items such as banners, signage, apparel, and other promotional materials. With its wide printing capabilities, it allows for expansive designs and vivid imagery.

2. Sublimation Technology: Utilizing sublimation printing technology, the L18050 transfers dye onto a variety of substrates, such as polyester-based fabrics, ceramics, and metals. This process ensures

Get Best Quote

vibrant colors, excellent color retention, and durable prints that resist fading and washing.

3. High Resolution Output: The printer boasts high-resolution printing capabilities, delivering crisp, detailed prints with resolutions up to [insert resolution here]. This ensures that intricate designs and fine details are accurately reproduced, enhancing the overall quality of the printed output.

4. Versatility: The L18050 offers versatility in terms of the substrates it can print on, allowing for a wide range of applications across various industries. Whether it's custom apparel, personalized gifts, or promotional materials, this printer can handle diverse printing needs.

5. Efficient Production: Designed for efficiency, the L18050 enables fast printing speeds without compromising print quality. This allows for quick turnaround times, making it suitable for both small-scale and large-scale production environments.

6. User-Friendly Interface: The printer features an intuitive interface that facilitates easy operation and control. With user-friendly software and controls, operators can efficiently manage printing tasks and make adjustments as needed.

7. Durability and Reliability: Built to withstand the demands of commercial printing environments, the L18050 is constructed with durable components and engineered for reliability. This ensures consistent performance and long-term productivity.

Overall, the Sublimation DT Printer L18050 combines advanced printing technology, versatility, and efficiency to deliver high-quality prints for a variety of applications, making it a valuable asset for businesses in the printing and promotional industries.
