The DTF (Direct to Film) Roll to Roll Module is a specialized printing system used for transferring designs directly onto flexible materials, like fabrics and films, in a continuous roll-to-roll manner. This module is equipped with high-speed and precision printing technology, enabling efficient and high-quality printing for various applications such as textile printing, signage, packaging, and more. It offers
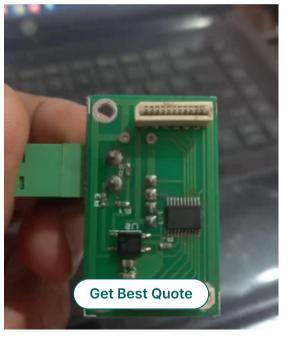

versatility, allowing businesses to produce customized prints on a wide range of substrates with ease and accuracy.

| **Color** | 6 Color |
| **Model/Type** | Epson |
| **Capacity** | 100 |
| **Brand/Make** | prolific |
| **Body Material** | pcb |
| **Curb Weight** | 100 gm |
| **Max Printing Width** | 12 |
| **Operating System** | windows |
| **Print Size** | 12×18 |
| **Voltage** | 220v |

Here are **5 key specs** of the **DTF L1800 PE Module** that are **universally applicable** across most searches and usage scenarios:

🔧 DTF L1800 PE (Printing Engine) Module – 5 Key Specs

- 🖨️ **Precision Micro Piezo Printhead**
  Integrated with Epson L1800's Micro Piezo printhead technology for high-resolution, smooth gradient printing—essential for DTF applications.

- 📦 **Dual Ink Layer Control (White + CMYK)**
  PE module enables accurate synchronization of white and CMYK layers, ensuring proper opacity and vibrant color on dark fabrics.
- ⚙️ **Integrated Motion & Feed Control**
  Manages film movement, printhead speed, and feeding precision—minimizing banding and boosting print stability on PET film.
- 🌡️ **Real-Time Temperature & Humidity Adaptation**
  Designed to maintain consistent output by adjusting for environmental changes—important for ink flow and adhesion in DTF.
- 🔄 **Compatible with RIP & Roll-to-Roll Systems**
  Fully works with RIP software (e.g., Acrorip, Maintop) and roll-feeding hardware to support automated DTF production.

| **Resolution** | 1440×720 |
| **Automation Grade** | Automatic |
| **Weight** | 5Kg |

| Number Of Stations | 1 |
|---|---|
| Driven Type | Automatic |

Here are **5 key specs/features** of a **DTF Vacuum Acrylic Printer**, a specialized setup ideal for flatbed-style direct-to-film printing:

🖨️ **DTF Vacuum Acrylic Printer – 5 Key Specs**

- 🧲 **Vacuum Suction Bed with Acrylic Top**
  Features a **flat acrylic surface** with built-in **vacuum suction**, ensuring the DTF film stays perfectly flat during printing—critical for high-detail, layered prints.

- 🖨️ **Precision CMYK+White Ink System**
  Equipped with dual-layer printing capabilities using **CMYK and White inks**, optimized for accurate DTF transfer and color vibrancy on dark or light fabrics.

- 📏 **Supports A3/A2 Film Sizes**
  Compatible with **A3 or A2-sized PET films**, making it suitable for both small batch and commercial-scale production.

- 🔧 **Integrated Heat Stabilization (Optional)**
  Some models include **mild heat or fan-based stabilization** beneath the acrylic to assist with ink drying and reduce smudging.

- ⚙️ **Works with RIP Software & Roll Feeders**
  Fully compatible with RIP software like **Acrorip, Maintop**, and often supports **roll-to-roll film feeders** for continuous operation.

| **Resolution** | 1440×720 |
| **Automation Grade** | Automatic |
| **Weight** | 200gm |
| **Number Of Stations** | 1 |

Here are **5 key specs related to Film Eject Handling** in a **DTF (Direct to Film) Module**:

- **Auto Film Eject Mechanism**
  Ensures smooth and automated film ejection after printing, reducing manual intervention and downtime.
- **Sensor-Based Film Detection**
  Uses optical or infrared sensors to accurately detect film position and trigger precise ejection timing.
- **Adjustable Tension Control System**
  Maintains optimal film tension during eject to prevent wrinkling, skewing, or tearing.
- **Stepper Motor-Driven Rollers**
  Provides consistent and controlled film movement for reliable and jam-free ejection.
- **Software-Controlled Eject Timing**
  Integrated with roll-to-roll software to coordinate eject speed, cooling time, and curing sync for seamless operation.

₹ 5000  <u>Get Latest Price</u>

📄 Product Brochure

| | |
|---|---|
| **Capacity** | 200 |
| **Object To Be Printed** | Vaccume for L1800 dtf |
| **Usage/Application** | Film |
| **Voltage** | 60W |
| **Finish** | Polished |
| **Resolution** | 1440×720 |
| **Automation Grade** | Automatic |
| **Weight** | 3Kg |
| **Number Of Stations** | 1 |
| **Driven Type** | Automatic |

Here are **5 key specs/features of a DTF L1800 Printer with Metal Vacuum Bed**:

🔧 **DTF L1800 Printer – Metal Vacuum Bed Key Specs**

- **High-Precision Metal Vacuum Platform**
  Provides a flat, stable surface for film placement, ensuring smooth feeding and minimizing wrinkles or shifting during printing.
- **Strong Suction Power with Adjustable Zones**
  Vacuum zones maintain film flatness using powerful, yet adjustable suction – critical for high-detail prints.
- **Anti-Static & Heat-Resistant Surface**
  Metal surface is treated to resist static and tolerate moderate heat, reducing print defects and static-related issues.
- **Enhanced Media Handling for A3+ Rolls**
  Optimized for handling A3 and A3+ roll films commonly used in L1800
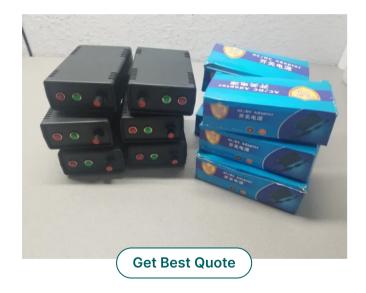

DTF setups, ensuring perfect alignment.
- **Integrated with Print & Powder Workflow**
Seamlessly works with white & color ink layering and hot-melt powder application, supporting continuous DTF roll-to-roll printing.

| Capacity | 2000 per hours |
|---|---|
| Material | Silicone |
| Usage/Application | Printing Industry |
| Brand | Chinese |
| Model Name/Number | L18050 |
| Applicable Machine Type | L18050 |

Here are **5 key specs** of the **C9345 Maintenance Tank Chip Resetter** for Epson printers:

- 🔧 **Compatibility with C9345 Maintenance Box**
  Works with Epson printers using the **C9345** maintenance tank, including models like L8050, ET-8500, ET-16600, WF-7820, and more.
- ⚡ **Power Source Options**
  Available in **USB-powered** or **battery-operated** versions, offering

[Get Best Quote]

flexible use for home or professional setups.

- ✅ **Reset Cycle Confirmation LED**
Built-in **LED indicator** confirms successful reset (typically turns green), making the process foolproof and easy.
- 🔁 **Reusable for Multiple Resets**
Supports **multiple reset cycles** (often 100+ uses), allowing long-term use without needing frequent replacements.
- 🪶 **Precision Contact Pins**
Equipped with **accurate pin alignment** to ensure proper contact with the chip, reducing the risk of damage or reset failure.

| **Applicable Machine Type** | L18050 |

**Minimum order quantity:** 5 Piece

Here are **5 key specs** of the **C9345 Chip Resetter** used for Epson printer maintenance boxes:

- 🔄 **Compatibility with C9345 Maintenance Box**
Specifically designed to reset chips on Epson printers that use the

**C9345** maintenance box (e.g., L8050, L15150, ET-16600, WF-7820, etc.).

- 🔋 **USB or Battery Powered**
  Available in **USB-powered** or **battery-operated** variants, offering flexibility for desktop or portable use.
- 💡 **LED Indicator Status**
  Built-in **LED light** signals reset success (usually turns green when complete), ensuring user-friendly operation.
- 🧩 **Pin-to-Chip Interface**
  Features precision-aligned pins that connect directly with the chip on the maintenance box for accurate contact and reset.
- ♻️ **Reusable Design**
  Supports **multiple reset cycles** (often 100+ uses), making it a cost-effective tool for extending the lifespan of maintenance boxes.

🔧 **L8050 DTF Resetter – 5 Key Specs & Features**

If you're using the **Epson L8050 for DTF printing**, a resetter helps maintain performance and avoid downtime due to firmware limits. Here are the key specs:

Get Best Quote

- **Chip Resetter Compatibility**
  Specifically designed to reset the waste ink pad counter on Epson L8050 series printers used for DTF, preventing "Service Required" errors.
- **One-Click Reset Operation**
  User-friendly plug-and-play system with a single button to reset ink pad counter in seconds—no need for complex software.
- **Supports Multiple Resets**
  Can be used for multiple reset cycles across different printers of the same model (L8050), extending printer lifespan.
- **USB Powered**
  Powered via USB port—no external power adapter required. Lightweight and portable for desktop setups.
- **Firmware Version Compatibility**
  Works with specific firmware versions—ensure your L8050 firmware matches supported versions (some newer firmware may block 3rd-party resetters).

| **Driven Type** | Automatic |

Here are **5 key specs/features** of a **DTF A3 Roll Stand**, designed to support efficient A3 roll-based printing:

🔗 **DTF A3 Roll Stand – 5 Key Specs**

- 📏 **Compatible with A3 Size Rolls (13-inch Width)**
Built to support **A3 roll film (typically 30cm to 33cm width)** used in DTF printing, ensuring smooth feeding and alignment.

- ⚙️ **Adjustable Roll Holder & Shaft System**
Features **adjustable tension rollers or rotating shafts** to accommodate various roll diameters and weights for consistent unwinding.

- 🔩 **Heavy-Duty Metal Frame**
Constructed with a **sturdy steel or aluminum base** to provide stability during high-speed printing operations.

- 🧲 **Anti-Slip & Locking Mechanism**
Equipped with **rubberized feet or wheel locks** to prevent movement during operation, maintaining print accuracy.

- ⚙️ **Compatible with L1800, L8050 & Similar A3 DTF Printers**
Universally designed to work with most **A3 DTF printers**, especially Epson-based setups like the **L1800**, **L8050**, and other flatbed or roll-to-roll DTF systems.

## Epson DX5 Damper

📞 Request Callback

**₹ 350**

📄 Product Brochure

| | |
|---|---|
| **Part Type** | Print Head |
| **Packaging Size** | 2 pcs |
| **Printer Type** | Inkjet Printer |
| **Usage/Application** | In textile machinery |
| **Color** | White |
| **Brand** | Epson l1800 |
| **Country of Origin** | Made in India |

An **Epson DX5 damper** is a critical component in inkjet printers utilizing the Epson DX5 printhead. Its primary function is to regulate ink flow from the ink reservoir to the printhead, ensuring consistent pressure and preventing issues like ink starvation or overflow. Additionally, the damper acts as a filter, capturing impurities and air bubbles that could clog the nozzles, thereby maintaining optimal print quality and prolonging the printhead's lifespan

# Printer Disc Filter

📞 Request Callback

₹ 200   Get Latest Price

📄 Product Brochure

| | |
|---|---|
| **Part Type** | Printer Filter |
| **Capacity** | 8 |
| **Object To Be Printed** | T Shirt |
| **Usage/Application** | Parts |
| **Finish** | Polished |
| **Resolution** | 1440×720 |

Here's a concise overview of a **Printer Disc Filter**, commonly used in inkjet and DTF printing systems:

🧲 **Printer Disc Filter – Description**

A **Printer Disc Filter** is a small, high-efficiency inline filter designed to prevent dust, dried ink particles, and other contaminants from entering the printer's ink system. It plays a vital role in maintaining smooth ink flow and protecting printheads from clogging and damage.

🔑 **Key Features**

- 🌸 **Ink Purity Protection**
Captures micro-particles and impurities, ensuring clean ink reaches the printhead.

- 🔄 **Long Printhead Life**
Helps extend the lifespan of expensive printheads by preventing clogs and inconsistent spray patterns.

- 💧 **Universal Compatibility**
Compatible with DTF, DTG, solvent, and pigment ink printers including Epson DX5, DX7, XP600, i3200, and others.
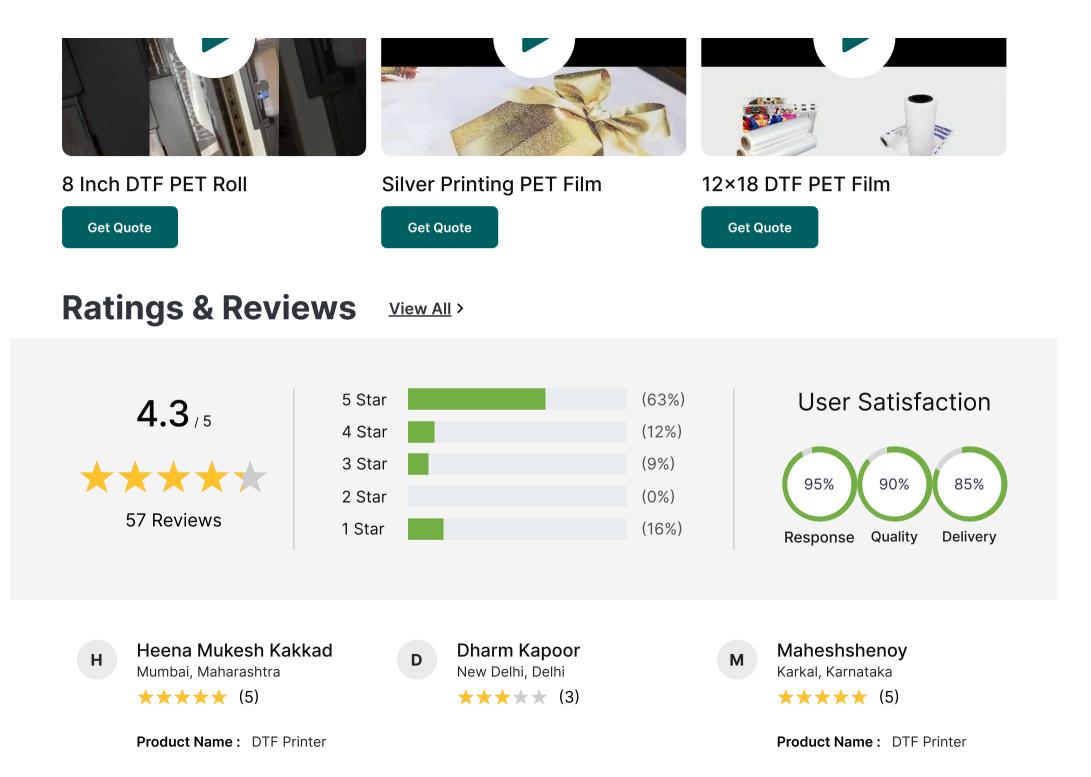

- ⚙️ **Easy to Install**
Quick-connect design fits seamlessly between the ink tube and damper or ink supply system.

- 🧪 **Solvent & Pigment Ink Resistant**
Made from high-grade plastic and membrane materials that withstand harsh ink formulations.
