Packaging Size	1 Litre
Usage/Application	Sublimation Printing
Color	CMKYWW
Brand	Inkbank
Form	Liquid
Ink Type	Sublimation
Suitable For	Printer

Minimum order quantity: 5 Bottle

Sublimation ink CMYKLCLM refers to a specific type of ink used in sublimation printing processes, incorporating the CMYK color model along with additional colors LCLM.

Here's what each component means:

Sublimation Printing: Sublimation printing is a method used to transfer

dye onto materials such as fabric, metal, or ceramics. The process involves printing the design onto sublimation transfer paper using special sublimation inks. Heat and pressure are then applied to transfer the design from the paper to the substrate, where the ink sublimates (changes from a solid to a gas) and bonds with the surface of the material.

**CMYK Color Model:** CMYK stands for Cyan, Magenta, Yellow, and Key (Black). These four colors are the standard colors used in most color printing processes, including sublimation printing. By combining varying proportions of these four colors, a wide range of colors can be produced, allowing for full-color printing.

**LCLM:** LCLM likely stands for Light Cyan and Light Magenta, which are lighter shades of cyan and magenta, respectively. These lighter shades are often used to achieve smoother gradients and finer details in prints, especially in photographic or highly detailed designs.

In summary, "Sublimation ink CMYKLCLM" specifies a type of sublimation ink that includes the standard CMYK colors (Cyan, Magenta, Yellow, and Key/Black) along with additional Light Cyan and Light Magenta colors. This ink set allows for full-color printing with smoother gradients and finer details, making it suitable for high-quality sublimation printing applications such as photography, artwork, and graphics.

Ideal for all types of sublimation printing on **polyester fabrics, mugs, cushions, plates, and more.**

✓ **Key Features:**

- ✓ **High-Definition Colors** – Ultra-rich Cyan, Magenta, Yellow, Black (CMYK), and optional Light Cyan & Light Magenta
- ✓ **Fast Drying & High Transfer Rate**
- ✓ **Clog-Free Performance** – Suitable for continuous printing
- ✓ **Fade Resistant & Wash Durable Prints**
- ✓ **Compatible with Epson L805, L1800, L1300, XP600, i3200 heads**

🔧 **Specifications:**

- Brand: **Sublinova**
- Available Colors: **CMYK / CMYKLCLM**
- Quantity: **100ML / 500ML / 1 Litre Bottles**
- Packaging: Leak-Proof Sealed Bottles
- Use For: Sublimation Transfer Printing
- Application: T-Shirts, Polyester Fabric, Mugs, Keychains, Cushions, Plates, etc.

📦 **Availability:**

- ✓ Ready Stock Available
- ✓ PAN India Shipping
- ✓ Bulk Orders Welcome
- ✓ Sample Packs Also Available
