Product Brochure

GSM	180
Size	A3 (297 × 420 mm)
Usage/Application	Printing
Brand	SRS
Color	White
Size/Dimension	24×100
Paper Type	Sublimation Roll
Width	24
Thickness	100

Here are 5 key bullet-point descriptions for **Sublimation Heat Transfer Paper**:

- **High Ink Absorption:** Special coating ensures excellent ink retention for vibrant and detailed image transfers.

Get Best Quote

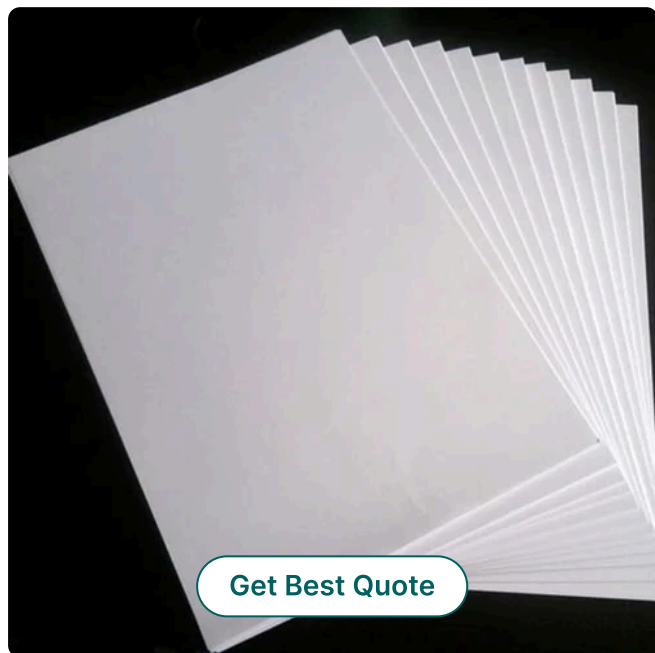

- **Fast Drying & Smudge-Free:** Quick-dry formula allows for smooth handling and consistent printing results.
- **Wide Compatibility:** Works seamlessly with all sublimation printers and sublimation inks.
- **Bright Color Output:** Transfers rich, vivid colors onto compatible surfaces like polyester fabrics, mugs, plates, and more.
- **Easy Heat Transfer:** Designed for use with heat press machines, ensuring clean and sharp image release with minimal effort.

₹ 560 [Get Latest Price](#)

Product Brochure

Roll Width	36 Inch
GSM	120 GSM
Product Type	Roll
Sheet Size	A3
Roll Length	150m
Color	White
Shelf Life	Up to 24 months

Sublimation A3 paper is a specialized paper used in sublimation printing processes, specifically designed for use with A3-sized designs. It plays a crucial role in achieving high-quality sublimation transfers onto various substrates, making it a popular choice for personalized and custom printing applications requiring larger print sizes.

Product Brochure

Roll Width	36 Inch
GSM	80 GSM
Product Type	Roll
Sheet Size	A4
Roll Length	150m
Color	White
Ink Compatibility	Dye-sublimation inks
Storage Tips	Store Flat In Original Packaging
Time	25-60 seconds
Shelf Life	24 months

Sublimation A4 paper refers to a specific type of paper used in sublimation printing processes, particularly with A4 paper size dimensions.

Here's what you need to know:

Sublimation Printing: Sublimation printing is a method used to transfer dye onto materials such as fabric, metal, or ceramic. The process involves printing the design onto sublimation transfer paper using special sublimation inks. Then, heat and pressure are applied to transfer the design from the paper to the substrate, where the ink sublimates (changes from a solid to a gas) and bonds with the surface of the material.

A4 Paper Size: A4 is a standard paper size used internationally, measuring 210 × 297 millimeters or 8.27 × 11.69 inches. A4 paper size is commonly used for various printing applications, including sublimation printing.

Sublimation Transfer Paper: Sublimation A4 paper is specifically designed for use in sublimation printing. It has a special coating that accepts sublimation inks and releases them when heat and pressure are applied during the transfer process. The A4 size makes it suitable for printing smaller designs or projects.

Compatibility: Sublimation A4 paper is compatible with inkjet printers that use sublimation inks. It's important to use the correct type of paper for sublimation printing to ensure optimal transfer results and color vibrancy.

Quality and Results: The quality of sublimation A4 paper can vary depending on the brand and formulation. High-quality papers are designed to produce sharp, vibrant prints with excellent color reproduction and transfer efficiency. It's essential to choose a paper that meets your specific printing needs and substrate requirements. In summary, sublimation A4 paper is a specialized paper used in sublimation printing processes, specifically designed for use with A4-sized designs. It plays a crucial role in achieving high-quality sublimation transfers onto various substrates, making it a popular choice for personalized and custom printing applications.
